Graduated from Software Engineering at Bina Sarana Informatika University. I currently work as a Freelance Full-Stack Developer. Web development is my true passion, and I find immense joy in creating websites that are not only innovative but also user-friendly. Over time, I've had wonderful opportunities to contribute to a variety of freelance projects as a Full Stack Developer.

Through my journey as a Freelance Full-Stack Developer, I have become well-versed in using technologies like Laravel, Vue.js, Typescript, and MySQL. Yet, despite my proficiency across full stack development, my heart lies in front-end development, an area that I am particularly drawn to and enthusiastic about.

## Experiences

### Freelance Full-Stack Developer

Apr 2021 - Present

- Building a Project Planning Management Application for PT. Laras Sembada, with the aim of facilitating users in managing project planning through a user-friendly interface.
- Developing an Admission System for New Students at STMIK Mercusuar to simplify the administrative process of new student admissions.
- Creating an E-KTM (Electronic Student ID Card) System using QR Codes, with the goal of making it easier for students to verify their identities.

### Front-End Developer Intern at PT. Baracipta Esa Engineering

Aug - Dec 2022

- Collaborated within a team as a Front-End Developer.
- Contributed to the development of the Estimator.id marketplace website to facilitate users in making purchases and utilizing services in the construction field.
- Applied UI/UX Design as a Front-End Developer.
- Gained experience in utilizing REST APIs.
- Learned and gained experience in using Git as a tool for team collaboration.
